H	2	7			
T	5	8			
O	7	5			

Do you agree with the way Ron has set out the subtraction?

Why?

4

a) $355 - 240 =$

b) $835 - 501 =$

- 5 A TV costs £120 less than this computer.

How much does the TV cost?

- 6 There are 849 people at a concert.

There are 625 adults at the concert.

- a) How many children are at the concert?

- b) How many more adults than children are at the concert?

- 7 What are the values of each of the shapes?

a)

	6	★	8
—	★	▲	▲
	●	1	5

$\square = \square$ $\square = \square$ $\square = \square$
 $\square = \square$ $\square = \square$ $\square = \square$

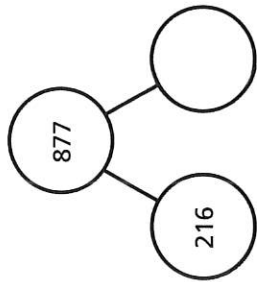

b)

	9	+	◆
—	+	4	◆
	◆	◆	◆

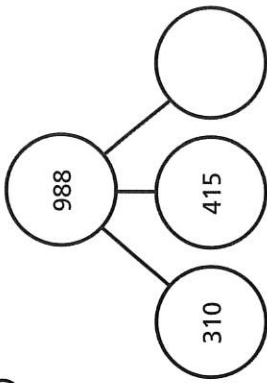

$\square = \square$ $\square = \square$ $\square = \square$
 $\square = \square$ $\square = \square$ $\square = \square$

- 8 Complete the part-whole models.

a)

b)

- 9 Eva is subtracting 727 from 1,000

First I subtract 1 from each number.

Then I subtract the two numbers.

So $1,000 - 727$ is the same as $999 - 726 = 273$

Why does Eva's method work?

Talk about it with a partner.

Use Eva's method to complete the subtractions.

$1,000 - 285 = \square$

$800 - 636 = \square$
